"SARMA Swiss Research Management Development Initiative"

8 Nov 2007, Birmensdorf

Dear members of the SARMA community,

Since its foundation in 1999, SARMA "Swiss Association of Research Managers" has been committed to strengthening the position of the research manager as the interface between management and research.

The launch of the "**SARMA Swiss Research Management Development Initiative**", a priority programme designed to promote young talent in research management, is intended to focus on hitherto activities. The initiative envisages measures at different levels for the identification and support for talented research managers, the development of training programmes as well as the international networking and exchange of research managers.

You are kindly invited to this half- day event which will inform about this initiative to be launched on 27 September 2007 and provide the opportunity to discuss its implementation in different topic related break-out sessions and in plenary debates.

The event is free of charge. If you would like to participate, please register online on www.sarma.ch or by e-mail to info@sarma.ch.

The registration deadline is 1 Nov 2007.

I look forward to meeting you all in Birmensdorf and wish you a pleasant time.

Kind regards,

Kirsten Leufgen, in behalf of the SARMA board
